Sec. 1751.01. As used in this chapter:

(A)(1) "Basic health care services" means the following services when medically necessary:

(a) Physician's services, except when such services are supplemental under division (B) of this section;

(b) Inpatient hospital services;

(c) Outpatient medical services;

(d) Emergency health services;

(e) Urgent care services;

(f) Diagnostic laboratory services and diagnostic and therapeutic radiologic services;

(g) Diagnostic and treatment services, other than prescription drug services, for biologically based mental illnesses;

(h) Preventive health care services, including, but not limited to, voluntary family planning services, infertility services, periodic physical examinations, prenatal obstetrical care, and well-child care;

(i) Routine patient care for patients enrolled in an eligible cancer clinical trial pursuant to section 3923.80 of the Revised Code.

"Basic health care services" does not include experimental procedures.

Except as provided by divisions (A)(2) and (3) of this section in connection with the offering of coverage for diagnostic and treatment services for biologically based mental illnesses, a health insuring corporation shall not offer coverage for a health care service, defined as a basic health care service by this division, unless it offers coverage for all listed basic health care services. However, this requirement does not apply to the coverage of beneficiaries enrolled in Title XVIII of the "Social Security Act," 49 Stat. 620 (1935), 42 U.S.C.A. 301, as amended, pursuant to a medicare contract, or to the coverage of beneficiaries enrolled in the federal employee health benefits program pursuant to 5 U.S.C.A. 8905, or to the coverage of beneficiaries enrolled in Title XIX of the "Social Security Act," 49 Stat. 620 (1935), 42 U.S.C.A. 301, as amended, known as the medical assistance program or medicaid, provided by the department of job and family services under Chapter 5111. of the Revised

Code, or to the coverage of beneficiaries under any federal health care program regulated by a federal regulatory body, or to the coverage of beneficiaries under any contract covering officers or employees of the state that has been entered into by the department of administrative services.

(2) A health insuring corporation may offer coverage for diagnostic and treatment services for biologically based mental illnesses without offering coverage for all other basic health care services. A health insuring corporation may offer coverage for diagnostic and treatment services for biologically based mental illnesses alone or in combination with one or more supplemental health care services. However, a health insuring corporation that offers coverage for any other basic health care service shall offer coverage for diagnostic and treatment services for biologically based mental illnesses in combination with the offer of coverage for all other listed basic health care services.

(3) A health insuring corporation that offers coverage for basic health care services is not required to offer coverage for diagnostic and treatment services for biologically based mental illnesses in combination with the offer of coverage for all other listed basic health care services if all of the following apply:

(a) The health insuring corporation submits documentation certified by an independent member of the American academy of actuaries to the superintendent of insurance showing that incurred claims for diagnostic and treatment services for biologically based mental illnesses for a period of at least six months independently caused the health insuring corporation's costs for claims and administrative expenses for the coverage of basic health care services to increase by more than one per cent per year.

(b) The health insuring corporation submits a signed letter from an independent member of the American academy of actuaries to

the superintendent of insurance opining that the increase in costs described in division (A)(3)(a) of this section could reasonably justify an increase of more than one per cent in the annual premiums or rates charged by the health insuring corporation for the coverage of basic health care services.

(c) The superintendent of insurance makes the following determinations from the documentation and opinion submitted pursuant to divisions (A)(3)(a) and (b) of this section:

(i) Incurred claims for diagnostic and treatment services for biologically based mental illnesses for a period of at least six months independently caused the health insuring corporation's costs for claims and administrative expenses for the coverage of basic health care services to increase by more than one per cent per year.

(ii) The increase in costs reasonably justifies an increase of more than one per cent in the annual premiums or rates charged by the health insuring corporation for the coverage of basic health care services.

Any determination made by the superintendent under this division is subject to Chapter 119. of the Revised Code.

(B)(1) "Supplemental health care services" means any health care services other than basic health care services that a health insuring corporation may offer, alone or in combination with either basic health care services or other supplemental health care services, and includes:

(l) Physical therapy services;

(m) Chiropractic services;

(P) "Intermediary organization" means a health delivery network or other entity that contracts with licensed health insuring corporations or self-insured employers, or both, to provide health care services, and that enters into contractual arrangements with other entities for the provision of health care services for the purpose of fulfilling the terms of its contracts with the health insuring corporations and self-insured employers.
