

Sub. H.B. 311
126th General Assembly
(As Reported by H. Health)

Reps. White, McGregor, Setzer, Schaffer, Oelslager, Coley, Allen, Peterson, Hood, Flowers, Brown, C. Evans, Barrett, Martin, Schneider, Reidelbach, S. Smith, DeBose

BILL SUMMARY

- Permits a dental assistant to apply pit and fissure sealants under certain circumstances.

CONTENT AND OPERATION

Background

A "pit and fissure sealant" is a resinous material designed for application to the occlusal surfaces of posterior teeth to seal the surface irregularities and prevent ingress of oral fluids, food, and debris.¹ According to the American Dental Association, sealants are applied through the following process:²

- (1) The teeth to be sealed are cleaned.
- (2) The chewing surfaces of the teeth to be sealed are roughened with an acid solution to help the sealant adhere to the teeth.
- (3) The sealant is "painted" onto the enamel of the teeth, where the sealant bonds directly to the teeth and hardens.

² American Dental Association. "Frequently Asked Questions: Sealants" (visited July 21, 2005), accessible at <http://www.ada.org/public/topics/sealants_faq.asp>.

Application of sealants

Current law

(R.C. 4715.01; O.A.C. 4715-3-01(N)(2), 4715-9-01(B)(2), and 4715-11-03(A)(1))

The placement of sealants is considered an "advanced remediable intra-oral dental task or procedure" under a rule adopted by the State Dental Board. Current law and rules adopted by the Board provide that the only individuals who are authorized to place sealants are dentists; dental hygienists, when supervised by a licensed dentist; and expanded function dental auxiliaries, when "directly supervised" by a licensed dentist.

The bill

(R.C. 4715.39)

The bill permits a dental assistant to apply pit and fissure sealants if the following requirements are met:

(1) A dentist evaluates the patient and designates the teeth and surfaces that will benefit from the application of sealant on the day the application is to be performed.

(2) The dental assistant is certified by the Dental Assisting National Board or the Ohio Commission on Dental Assistant Certification (see **COMMENT**, below).

(3) The dental assistant has successfully completed a course in the application of sealants consisting of at least two hours of didactic instruction and six hours of clinical instruction through a program provided by an institution accredited by the American Dental Association Commission on Dental Accreditation or a program provided by a sponsor of continuing education approved by the State Dental Board.

(4) The dentist supervising the assistant has observed the assistant successfully apply at least six sealants.

(5) The dentist supervising the assistant checks and approves the application of all sealants placed by the assistant before the patient leaves the location where the sealant application is performed.

COMMENT

Dental Assisting National Board

To be certified by the Dental Assisting National Board (DANB), a person must pass the certified dental assistant (CDA) examination administered by DANB. To be eligible to sit for this examination, a person must meet the requirements of one of the following three pathways:³

(1) Pathway 1

- Graduate from a dental assisting or dental hygiene program that is accredited by the American Dental Association.
- Obtain a cardiopulmonary resuscitation (CPR) certificate from a DANB-accepted CPR course earned within two years prior to the examination date for which application is made.

(2) Pathway 2

- Graduate from high school or obtain a General Educational Development (GED) certificate.
- Work either (a) a minimum of two years, full-time (at least 3,500 hours accumulated over 24 months), as a dental assistant verified by a dentist-employer, or (b) work at least 3,500 hours, a combination of full- and part-time or part-time only, over a minimum of 24 months and a maximum of 48 months as a dental assistant verified by a dentist-employer.
- Obtain a cardiopulmonary resuscitation (CPR) certificate from a DANB-accepted CPR course earned within two years prior to the examination date for which application is made.

(3) Pathway 3

- Meet one of the following three requirements:
 - Be a current or former DANB certified dental assistant;

³ *Dental Assisting National Board (DANB). "2005 DANB Exam Candidate Guide" (visited July 21, 2005), accessible at <<http://www.dentalassisting.com/PDFs/CDAweb04.pdf>>.*

- Graduate from an ADA-accredited DDS or DMD program;
- Graduate from a foreign dental degree program.
- Obtain a cardiopulmonary resuscitation (CPR) certificate from a DANB-accepted CPR course earned within two years prior to the examination date for which application is made.

Ohio Commission on Dental Assistant Certification

To be certified by the Ohio Commission on Dental Assistant Certification, a person must pass the examination administered by the Commission. To be eligible to sit for this examination, a person must meet the following requirements:⁴

(1) Education

- Meet one of the following requirements:
 - Have a minimum of six months of continuous full-time work experience.
 - Be enrolled in the second year of a two-year dental assisting program.
 - Be enrolled in a post-high school dental assisting program.

(2) Other

- Provide proof of meeting the professional ethics requirement.
- File a correct and complete application prior to the application deadline.
- Pay the correct fee.
- Provide proof of a current cardiopulmonary resuscitation (CPR) certificate.
- Submit two passport photographs.
