

Sub. H.B. 164

127th General Assembly
(As Reported by H. Health)

Reps. R. McGregor, J. McGregor, Huffman, Evans, Skindell, Seitz, Dodd, Widener, Flowers, J. Stewart, Gibbs, Stebelton, D. Stewart, Bacon, Daniels, Miller, Foley, Wachtmann, Chandler, Peterson, White, Webster, Otterman, Fende, Brown, Boyd

BILL SUMMARY

- Permits the Department of Health to enter into an agreement with the state's primary care association to promote the establishment of new federally qualified health centers (FQHCs) and FQHC look-alikes.
- Requires the Department and the state's primary care association, if the Department enters into an agreement with that association, to assist local communities and community health centers by providing grants and grant writing assistance to establish health centers.
- Extends participation in the Medical Liability Insurance Reimbursement Program to FQCH look-alikes.
- Permits the Department to establish a pilot program to place two FQHCs within or adjacent to hospital emergency departments--one in a rural area and the other in an urban area.

CONTENT AND OPERATION

Background--FQHCs and FQHC look-alikes

According to the Centers for Medicare & Medicaid Services (CMS) in the U.S. Department of Health and Human Services, federally qualified health centers (FQHCs) are safety net providers of healthcare. They include community health centers, public housing centers, outpatient health centers funded by the Indian Health Service, and programs serving migrants and the homeless. An entity may qualify as an FQHC if it (1) receives a grant under Section 330 of the federal

Public Health Services (PHS) Act,¹ (2) receives funding from a PHS Act grant described in (1), above, under a contract with the recipient of such a grant and meets the requirements to receive a grant under Section 330 of the PHS Act, or (3) is an outpatient health program or facility operated by a tribe or tribal organization under the federal Indian Self-Determination Act or by an urban Indian organization receiving funds under Title V of the Indian Health Care Improvement Act as of October 1, 1991.²

An entity is a "FQHC look-alike" if the U.S. Secretary of Health and Human Services has determined that the entity meets the requirements for receiving a PHS Act grant but does not actually receive a grant. An FQHC look-alike is eligible, however, for enhanced Medicaid and Medicare reimbursement, participation in the 340(b) Federal Drug Pricing Program,³ and automatic designation as a Health Professional Shortage Area. Applicants for FQHC look-alike designation must be fully operational at the application date and (1) be a public or private nonprofit entity, (2) serve, in whole or in part, a designated "Medically Underserved Area" or "Medically Underserved Population,"⁴ (3) meet

¹ Section 330 of the Public Health Service Act defines federal grant funding opportunities for organizations to provide care to underserved populations. Rural Assistance Center. *FQHC Frequently Asked Questions* (last visited May 2, 2007), available at <http://www.raconline.org/info_guides/clinics/fqhcfqa.php#whatis>.

³ The 340B Drug Pricing Program resulted from enactment of Public Law 102-585 (the "Veterans Health Care Act of 1992"), which is codified as Section 340B of the Public Health Service Act. Section 340B limits the cost of covered outpatient drugs to certain federal grantees, FQHC look-alikes, and qualified disproportionate share hospitals. Significant savings on pharmaceuticals may be achieved by entities that participate in this program. ⁴ Medically Underserved Areas (MUAs) and Medically Underserved Populations (MUPs) have shortages of primary medical care, dental, or mental health providers and may be geographic (a county or service area) or demographic (*e.g.*, have a high concentration of low income, Medicaid-eligible populations or have cultural or linguistic access barriers to primary medical care services). They are each assigned an Index of Medical Underservice (IMU) score, which is used to determine the eligibility of an area or population for MUA or MUP status. U.S. Department of Health and Human Services, Health Resources and Services Administration. *Medically Underserved Areas/Medically Underserved Populations (MUA/MUP)* (last visited May 3, 2007), available at <<http://muafind.hrsa.gov/>>.

the statutory, regulatory, and policy requirements for grantees supported under Section 330 of the Public Health Service Act, and (4) comply with the policy implementation documents for the Balanced Budget Act of 1997 amendment that added the requirement that an FQHC Look-Alike entity may not be owned, controlled, or operated by another entity.⁵

Promotion of new FOHCs

(R.C. 3701.047)

The bill permits the Department of Health to enter into an agreement with the state's primary care association to promote the establishment of new FQHCs and FQHC look-alikes. At present, Ohio's primary care association is the Ohio Association of Community Health Centers.⁶

Grant and grantwriting assistance--"FQHC Incubator Program"

(R.C. 3701.047; Section 4)

The bill requires the Department of Health and the state's primary care association, if the Department enters into an agreement with that association, as described above, to assist local communities and community health centers by providing grants and grant writing assistance to establish "health centers" as this term is defined in Section 330 of the Public Health Services Act.⁷ The Department and association are to engage in this assistance regardless of whether a particular health center applies for a Section 330 grant.

⁷ Section 330 of the Public Health Services Act (codified in 42 U.S.C. 254b) defines a "health center" as, in general, an entity that serves a population that is medically underserved, or a special medically underserved population comprised of migratory and seasonal agricultural workers, the homeless, and residents of public housing, by providing, either through the staff and supporting resources of the center or through contracts or cooperative arrangements (1) required primary health services, and (2) as may be appropriate for particular centers, additional health services necessary for the adequate support of the primary health services, for all residents of the area served by the center.

Medical Liability Insurance Reimbursement Program

(R.C. 2305.2341)

The main appropriations bill for the 2006-2007 biennium (Am. Sub. H.B. 66) created the Medical Liability Insurance Reimbursement Program. Under the Program, the Department of Health must reimburse participating free clinics⁸ up to 80% of the premiums the clinics pay for medical liability insurance coverage for clinic staff and volunteer health care professionals and health care workers, up to a maximum of \$20,000. The coverage must be limited to claims that arise out of the diagnosis, treatment, and care of patients of free clinics. To participate in the Program, a free clinic must provide certain information to the Department of Health at the time of registration. Existing law provides that appropriations to the Department may be made from the General Revenue Fund to support this Program.

The bill extends participation in the Medical Liability Insurance Reimbursement Program to FQHC look-alikes, including the centers' staff and volunteer health care professionals and health care workers. Under the bill, participating FQHC look-alikes are subject to the requirements applicable to participating free clinics.

The bill provides that free clinics that register for coverage are to receive priority over FQHC look-alikes.

Pilot program--FQHCs in or adjacent to hospital emergency departments

(Section 3)

The bill authorizes the Department of Health to establish a pilot program to place two FQHCs within or adjacent to hospital emergency departments. One health center must be in or adjacent to a hospital located in an urban area;⁹ the other must be located in or adjacent to a hospital located in a rural area.¹⁰

⁸ A free clinic is a nonprofit organization exempt from federal income taxation under Section 501(c)(3) of the Internal Revenue Code of 1986, or a program component of a nonprofit organization, the primary mission of which is to provide health care services for free or for a minimal administrative fee to individuals with limited resources (R.C. 2305.2341(D)).

⁹ The bill defines "urban area" as any area of Ohio located in a metropolitan statistical area. ("Metropolitan statistical area" is not defined in the bill, but is defined in current law (R.C. 3702.51(BB)(1)) for purposes of the certificate of need law as an area of Ohio designated as a metropolitan statistical area or primary metropolitan statistical area in

If the Department chooses to establish a pilot program, the bill requires each hospital and health center that participates in the pilot program to prepare and submit a report to the Governor and General Assembly, not later than one year after the health centers become operational, regarding the number of patients that received care at the health centers for nonemergency conditions rather than receiving care at the emergency department.

If the Department is unable to establish the pilot program not later than one year after the bill's effective date, the bill requires the Department to submit a report to the Governor and the General Assembly indicating the Department's progress.
